(a) temporal Hölder regularity
low-freq time embed.: $\gamma_s = 0.84$
high-freq time embed.: $\gamma_s = 0.47$
$\mathbb{E}\|s_\theta(x, t+\delta) - s_\theta(x, t)\| / \mathbb{E}\|s_\theta\|$
time increment δ
(b) window-averaging residual ($\kappa = 2/3$)
low-freq: slope -0.19
high-freq: slope -0.16
diagnostic osc(N)
step count N
